

RAPPROLIVE! DO YOU WANT TO IMPROVE THE WAY INTERCOMPANY DATA IS RECONCILED ?

Rapprolive!, a functionality integrated within SAP BFC, enables users to view intercompany amounts converted to the reporting currency directly in their packages in real-time. This add-on, which is simple to implement, can be operational within a few hours.

SAP BFC native features for intercompany reconciliations

Intercompany reconciliations are performed at central site once the consolidation processing is completed. The data to be reconciled is shown in the consolidation currency

ITS FEATURES

- The differences between intercompany declarations are shown in **the reporting unit's data entry currency**.
- Rapprolive! **converts all variation flows in the balance sheet** and income statement using the rate types specified in the category scenario corresponding to the reporting set.
- **Rapprolive!** provides the date and time each intercompany declaration is saved in order to manage **the adjustments of amounts by reporting units more effectively**.

OUR TARGET AUDIENCE?

Rapprolive! is intended **for Groups who publish their consolidated accounts using SAP BFC**.

OUR STRENGTHS

- Less intervention required at central site in reconciling intercompany data.
- No consolidation processing or reconciliation processing is required.
- Real-time data **reconciliation**.

OUR OTHER SOLUTIONS

- **Vialease**, for managing lease financing.
- **Viatik**, for managing corporate legal information.
- **Lock!**, for locking data.
- **Datalive!**, for auditing source.
- Notes to the financial statements.
